Introduction

Welcome to CyberGames! This user manual will guide you through each level of our cybersecurity learning platform. Each game is designed to teach you important cybersecurity concepts in an interactive and engaging way.

Level 1: Securing Password

Overview

Learn about password security and how to create strong passwords through interactive challenges.

How to Play

1. The game consists of 3 stages
2. In each stage, you'll be given specific requirements for creating a password
3. Enter a password that meets all the given criteria
4. Complete all 3 stages to pass the level

Tips

- Use a combination of uppercase and lowercase letters
- Include numbers and special characters
- Avoid using personal information
- Make passwords at least 8 characters long

Level 2: Phishing Detector

Overview

Learn to identify phishing emails and protect yourself from email-based scams.

How to Play

1. You'll receive various emails to analyze
2. Read the email content carefully
3. Look for common phishing indicators:
 - Urgent or threatening language
 - Suspicious links or attachments
 - Requests for personal information
 - Poor grammar or spelling
4. Click "Report" if you identify a phishing email
5. Click "Not Phishing" if the email appears legitimate

Tips

- Check the sender's email address
- Hover over links before clicking
- Be suspicious of unexpected attachments
- Verify requests for personal information

Level 3: Cyber Hygiene

Overview

Learn essential cybersecurity practices and habits to protect your digital life.

How to Play

1. Complete a series of practical tasks
2. Each task focuses on a different aspect of cyber hygiene

3. Follow the on-screen instructions
4. Complete all tasks to pass the level

Tips

- Keep software and systems updated
- Use strong, unique passwords
- Enable two-factor authentication
- Regularly backup important data
- Be cautious with public Wi-Fi

Level 4: Malware Attack

Overview

Learn about different types of malware and how to protect against them.

How to Play

1. The game consists of 4 stages
2. Each stage features a different type of malware
3. Identify the malware type
4. Select the appropriate protection method
5. Complete all stages to pass the level

Types of Malware Covered

- Viruses
- Ransomware
- Spyware
- Trojans

Protection Methods

- Antivirus software
- Firewalls
- Regular updates
- Safe browsing habits
- Email security

General Tips

1. Take your time to understand each concept
2. Read all instructions carefully
3. Don't hesitate to retry levels if needed
4. Apply what you learn in real-world situations

Support

If you encounter any issues or have questions:

- Check the level explanations on the main page
- Review the tips provided in each level
- Take notes of important security concepts

Remember: The goal of CyberGames is to make cybersecurity learning fun and practical. Take your time, learn from mistakes, and most importantly, apply these security practices in your daily digital life.
